Professional Summary

Multidisciplinary Software Engineer with hands-on experience architecting and deploying end-to-end web and mobile applications (React, Next.js, Node.js, Flutter), automated data-analytics and processing pipelines (Python, R, pandas), and secure system architectures. Skilled in hybrid database design (PostgreSQL, MySQL, MongoDB), robust security protocols (JWT, Row-Level Security, secure authentication), and complete project lifecycle ownership from system design to production deployment. Well-positioned to deliver impact across software engineering, data analytics, and cybersecurity roles.

Technical Skills

- **Programming Languages:** Python, C, C++, JavaScript, PHP, R
- **Databases:** PostgreSQL, MongoDB (hybrid relational/NoSQL architecture), Firebase/Firestore, SQLite
- **Data & Automation:** Programmatic document/data generation, data extraction & structuring from unstructured sources, XML schema validation, Bash scripting
- **Cloud:** Google Cloud Platform (Cloud Computing Fundamentals - certified)
- **Web/Backend:** React, Next.js, Node.js, TypeScript, REST APIs, HTML, CSS, Bootstrap
- **Tools & Practices:** Git, GitHub, version control workflows

Experience

Aikshetra Tech Solutions

Project Based Internship

Node.js, JavaScript, Bash, ETL, Shell Scripting

- Built an automated ETL document-processing pipeline in Node.js to extract, parse, and structure unstructured source code archives into schema-compliant reports.
- Engineered Bash scripts for automated directory traversal, file system parsing, and data validation, creating a repeatable data ingestion workflow.

Deloitte (via Forage)

Virtual Job Simulation

Data Analysis, Forensic Technology, Data Cleaning, Anomaly Detection

- Completed a hands-on forensic technology job simulation involving raw data processing, validation, and pattern recognition.
- Applied structured data manipulation techniques to trace anomalous entries, maintain data integrity, and compile decision-ready analytical reports.

Projects

- **QR Authenticated Voting System** (*Node.js, Express.js, Supabase, face-api.js, PWA*): Built a full-stack QR-code and facial-recognition voting authentication platform with a conflict-detection engine, OTP based signup/reset, JWT authentication, brute-force lockout, and Row-Level Security, deployed as an installable PWA. Live - [GitHub](#)
- **Customer Churn Prediction System** (*Python, scikit-learn, pandas, XGBoost, SHAP, FastAPI, Streamlit*): Built an end-to-end machine learning pipeline to predict subscription and telecom customer churn, featuring automated preprocessing, behavioral feature engineering, Stratified K-Fold cross-validation optimized for Precision-Recall AUC, and SHAP explainability, delivered through a FastAPI backend and interactive Streamlit dashboard. Live - [GitHub](#)
- **Nest Hub** (*Next.js, React, Node.js, PostgreSQL, MongoDB, Payment Gateway*): Built a full-stack rental management platform connecting tenants and property owners, featuring secure KYC onboarding, a real-time property availability calendar, and a hybrid relational/document data model. Live - [GitHub](#)
- **RepVault** (*Next.js, TypeScript, Supabase, MediaPipe, Tailwind CSS*): Built a full-stack AI-assisted personal trainer platform featuring real-time pose estimation form analysis, sub-16ms optimistic UI via Next.js Server Actions, and strict multi-tenant Row-Level Security for client-trainer isolation. Live - [GitHub](#)

Education

Seshadripuram College, Tumkuru

Bachelor of Computer Science

2026

CGPA: 8.42/10.00

St. Claret Pre University College, Bengaluru

Higher Secondary Certificate

2023

Overall: 84.83%

Navodaya Vidyaniketan High School, Bengaluru

Secondary School Certificate

2021

Overall: 76.16%

Certifications

- **Advanced Software Engineering Job Simulation** – Walmart Global Tech / Forage (July 2026)
- **Data Analytics Job Simulation** – Deloitte / Forage (July 2026)
- **Getting Started with Artificial Intelligence** – IBM SkillsBuild (November 2025)
- **R Programming for Beginners** – Simplilearn (October 2025)
- **Introduction to Cyber Security** – Cisco Networking Academy (September 2026)
