PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (2026) with hands-on experience building full-stack applications on hybrid relational/NoSQL data architectures, and designing an automated data-extraction and document-generation pipeline used in a live production workflow. Comfortable working across Python and JavaScript/TypeScript, with a working foundation in cloud computing fundamentals (certified) and a strong interest in data engineering, pipeline automation, and cloud-native systems.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript, PHP, R

Databases: PostgreSQL, MongoDB (hybrid relational/NoSQL architecture), Firebase/Firestore, SQLite

Data & Automation: Programmatic document/data generation, data extraction & structuring from unstructured sources, XML schema validation, Bash scripting

Cloud: Google Cloud Platform (Cloud Computing Fundamentals – certified)

Web/Backend: React, Next.js, Node.js, TypeScript, REST APIs, HTML, CSS, Bootstrap

Tools & Practices: Git, GitHub, version control workflows

EXPERIENCE

Aikshetra Tech Solutions Private Limited — Tumkuru, Karnataka*[Project Based Internship Program] | [11-03-2026 – 11-04-2026]*

Designed and built a document-generation pipeline (Node.js, the *docx* library) that extracts and structures project data from raw source archives into standardized, schema-compliant academic reports — an ETL-style workflow turning unstructured input into structured, validated output.

Used Bash to navigate and parse nested project archive structures across multiple source projects, supporting consistent, repeatable data intake for the reporting system.

Deloitte (via Forage) — Virtual *[Data Analyst Participant] | [July 2026]*

Completed a hands-on job simulation focusing on data analysis and forensic technology to investigate and interpret complex data structures.

Processed, validated, and analyzed raw datasets to uncover hidden patterns, trace anomalous entries, and extract actionable insights.

Applied structured data manipulation and forensic analytical techniques to ensure data integrity and deliver clear, decision-ready reports.

PROJECTS

NestHub — Tenant/Owner Rental Platform

Built a React/Next.js and Node.js platform connecting tenants and property owners, with secure KYC onboarding and a real-time availability calendar.

Designed the backend around a hybrid PostgreSQL/MongoDB data architecture with integrated payment gateway support — combining relational and document-store data models in one system.

Flutter Expense Calculator

Developed a Flutter/Dart mobile app with Light/Dark mode support, local data persistence, and real-time state management for full offline availability.

Implemented dynamic data visualization for weekly and monthly spending trends from locally stored transaction data.

EDUCATION

Seshadripuram College, Tumkuru — Bachelor of Computer Science*2026*

CGPA: 8.33 / 10.00

St. Claret Pre University College, Bengaluru — Higher Secondary Certificate*2023*

Overall: 84.83%

Navodaya Vidyaniketan High School, Bengaluru — Secondary School Certificate*2021*

Overall: 76.16%

CERTIFICATIONS

Advanced Software Engineering Job Simulation — Walmart Global Tech / Forage (July 2026)

Data Analytics Job Simulation — Deloitte / Forage (July 2026)

Introduction to Cloud Computing — Simplilearn (July 2026)

Getting Started with Artificial Intelligence — IBM SkillsBuild (November 2025)

Introduction to Digital Marketing Fundamentals Course — Simplilearn (November 2025)

R Programming for Beginners — Simplilearn (October 2025)
